THE GAME CHANGER

SUBLIMATION NO-CUT MEDIA

Until now, sublimation inks have been limited to 100% Polyester garments.

The revolutionary new sublimation transfer media from FOREVER has removed the sublimation limitations - Printing sublimation inks onto cotton is now a possibility.

Each of our sublimation solutions has been developed with a specific job in mind - for white, light or dark colored cotton, with and without the glitter option.

SUBLI-LIGHT (NO-CUT) GLITTER

FOR WHITE & LIGHT COLORED COTTON

Transfer paper for printing white and light colored textiles with an incredible multi-color glitter effect without a background transfer. Suitable for fine and coarse-meshed textiles.

Printable Materials: White or Light Cotton, Wood & More
Formats: A3, A4, Letter, Tabloid & Rolls (43 cm x 25 m & 61 cm x 25 m)

SUBLI-FLEX (NO-CUT)

FOR DARK & LIGHT COLORED COTTON

The 1-Paper solution for printing light and dark colored textiles without a background transfer. By printing single color designs, hundreds of different color options can be achieved from a basic tone (e.g. Yellow). The storage of several colors, as well as the annoying cutting and weeding of regular Flex/Vinyl belongs to the past.

Printable Materials: Dark or Light Cotton, Wood & More
Formats: A3, A4, Letter, Tabloid & Rolls (43 cm x 25 m)

SUBLI-LIGHT (NO-CUT)

FOR WHITE & LIGHT COLORED COTTON

Transfer paper for printing white and light colored textiles without a background transfer. This 1-Paper solution is very soft and extremely elastic. Suitable for fine and coarse-meshed textiles.

Printable Materials: White or Light Cotton, Wood & More
Formats: A3, A4, Letter, Tabloid & Rolls (43 cm x 25 m & 61 cm x 25 m)

SUBLI-DARK (NO-CUT) GLITTER

FOR DARK & LIGHT COLORED COTTON

1-Paper solution for printing on light and dark colored textiles without background transfer. The fine glitter particles give the printed colors a particularly high-quality look. Suitable for fine and coarse-meshed textiles.

Printable Materials: Dark or Light Cotton, Wood & More
Formats: A3, A4, Letter, Tabloid & Rolls (43 cm x 25 m)

THE PROCESS

SUBLIMATION NO-CUT MEDIA

Use a regular sublimation printer to print a full-tone CMYK design on to either our standard or glitter transfer media solutions.

Transferring your designs to the cotton garment is a 1-Paper process. Simply print, press to the garment & repress to fix, as well as increase the washability.

Adding glitter to your product offerings is as simple as changing the paper to our sublimation glitter transfer media.

*White is coming soon. Printing White will require a special ink.
